Podziękowania

All is well that ends well... So does my PhD period in Groningen. I have spent here almost six interesting and intense years. It was not always easy, but I consider this time an important experience in my life. I have learned a lot and was always happy with the decision of coming for my PhD studies to the Netherlands, to Groningen, and, especially, to Marco's group.

First, I would like to express my deepest gratitude to my supervisor. Dear Marco, thank you for giving me the opportunity to work in your group and the constant support during the last years. Your door was always open to me. I enjoyed working on the diverse projects and the many collaborations. I appreciate your great ideas, critical opinions, patience, and optimism. You have helped me grow as a scientist and as a person. You are an excellent supervisor, and you have created a very nice and stimulating environment to work in.

I owe my gratitude to the reading-committee members for the evaluation of my thesis: Prof. Andrea Mattevi, Prof. Dick Janssen, and Prof. Dirk Jan Slotboom.

I would like to acknowledge the Oxygreen project partners who made the research described in this thesis possible: Dr. Leszek Rychlewski, Dr. Lucjan Wyrwicz, and Piotrek for the bioinformatic analyses; Dr. Wouter Duetz for valuable advice, Prof. Ulrich Schwaneberg, Alex, and Amol for hosting me in Aachen and the help with the library preparation; and Prof. Marko Mihovilovic and Michael for the collaborations on BVMOs. Furthermore, I would like to thank Prof. Andrea Mattevi and the team in Pavia: Roberto, Christian, and Stefano for the fruitful collaborations on many projects.

I wish to thank all the past and present members of the Molecular Enzymology team and the whole Biotechnology group for their help, discussions, lunch- and coffee breaks, and for the many outside-lab activities. Thanks to my office mates for the help and nice chats. There are a few people who deserve a special acknowledgement. Anette, we spent almost five years together in Groningen, sharing the lab bench and many memorable moments outside the lab. Thank you for the friendship, inspiration, positive energy, and all the special gifts. I am so happy that I will attend your defense soon. All the best to you and Sebastian! Hugo, thanks for the smart advice, discussions, and for being the manager of my thesis ;-) Good luck with yours and with your future career. Gonzalo and Cristina, thank you for the work you have done on PAMO mutants and for the time we enjoyed in Groningen and in Spain. Edwin, thank you for the collaborations on the PAMO-related projects and for your support in the job hunting. Best wishes to you and your family! Alja, thank you for the ladies-nights, baking experiments, fashion advice, and *gezelligheid*. I always appreciated your opinions, and we have had lots of fun in Groningen, Leiden, and Oegstgeest. Maarten, it was great to share the office with you for two years. I enjoyed our chats on music, cooking, and cars ;-) All the best to both of you! Special thanks go to Piet Wietzes, Theodora

Tiemersma-Wegman, and Monique Smith for their invaluable technical support. You were always willing to share your time and experience.

I would like to thank my students: Petra, Gilles, and Jonathan for their contributions to the projects, and to the guests in the biochemistry lab who I worked with: Ana, Saima, Patrícia, Laura, Elisa. I enjoyed working with you, and I have learned a lot as well. Good luck with your further studies and work. Ana, you made my last year in Groningen special, thank you for the visits, coffees, hours at the gym, mojitos, borrels, and parties... *salud, dinero y amor!* Laura, *linda*, meeting you and working with you was a great experience. I wish you to finish the thesis soon, and hope to visit you in Argentina! Patrícia, thank you for the nice collaborations on several projects. Hopefully, the results will be published soon. Good luck with your academic career!

I would also like to say “thank you” to Kevin, Patrick, Jet, and Wim Jan. You helped me a lot at different points of my PhD, and without this help, I would have not finished the thesis. Thanks to all the people who helped me with editing of this book. Special thanks to Jeffrey for taking the photo for the cover (it was great to be part of that photo session!) and for designing the cover.

To my paranympths, I am lucky and honored to have you next to me during this important day; thank you for agreeing to be there. Danny, I am grateful for the time you spent helping me in the first years of my PhD. Thank you for sharing the secrets of BVMOs and *the different view*. Thank you for the advice and support in the time preceding the defense, for translating the summary to Dutch, and finally, for the parties and time we enjoyed in Groningen, Leiden, and other places. Cheers to many more! Jacek, I would have probably never come to Groningen if not for your lobbying :-). Thank you for all discussions on science, cooking, music, and sports, for the awesome dinners and parties in Beijum and Antwerp, for the twisted sense of humor, exercising the Slavic spirit of complaining, and much more... I wish you and Wojtek all the best!

Marysia & Maciek, you were the best housemates ever! Thank you for sharing the home with me for over three years, for the friendship, help, patience, and the fun times. Marysia, good luck with finishing your thesis. Maciek, I hope your company will grow. And I wish the two of you many happy years together! Wojtek, we arrived to Groningen almost at the same time. Thank you for your care, patience, enthusiasm, and the fun we shared! Life in Groningen would not be the same without the Polish mafia and friends: Gosia, Sławek, Agata, Piotrek, Mariusz, Dorothy, Justyna, Michiel, Ewa, Łukasz, Kasia, Maciek, Magda, Bartek: I could always count on your support and on having fun together, thank you for everything! Thanks to my friends in Poland and in different parts of the world: Natalia, Ola, Kasia, Magda, Beata, Monika. Thanks to the team “Capibara” for the successful pubquiz participations, to my sportmates, to the games-club members,

to the Bible study group for the inspiration, fun, and delicious food, to the Spanish, the Italians, the friends from the chemistry department & Nijenborgh 4, and to everybody else who was close to me and supported me during the past six years.

Lastly, I would like to thank my family. Dear Mum, Dad, Kasia, Janek, Jurek, Grandma, Grandpa, Ewa, Albert, Daphne, Aunt Bogusia: without your love and support, I would have never achieved so much. Thank you for everything. Kochani Mamo, Tato, Kasiu, Janku, Jurku, Babciu, Dziadku, Ewa, Albert, Daphne, Ciociu Bogusiu: dziękuję Wam za Waszą miłość i wsparcie, bez których nigdy nie osiągnęłabym tak wiele.

Going from Pasikowice to Groningen was a big step, and who knows what my next destination will be... With the mind full of good memories of the time spent in Groningen, I am looking forward to the future.

Hanna
